I have only listed the final positions and point score but if anyone wants to see the calculations please ask. I have used the formula originally developed by Andrew Cordle for the Club League. Running speed in min/km is adjusted for age and gender. The adjusted fastest running speed scores 100 points and points are awarded as percentage. The Junior Championship is open to M/W14 only and has an additional adjustment to technical difficulty of course.

The trophies will be presented at New Years Day Novelty.
